IOIO POWERMIX

MORTAR . PLASTER . FIRE PROOFING

IOIO POWERMIX SPECIFICATIONS

Industry professionals choose Spray Force for our innovation, experience, and four decades of proven quality. Compare our specifications and ask us how Spray Force equipment is different.

- Hydraulically powered resulting in minimal maintenance and no mechanical failure
- Fully reversible operation — forward and reverse for removing obstructions
- Full power operation in both forward and reverse directions
- 15 HP gas engine or optional electric engine
- Torque flex axle — more heavy duty and a smoother ride
- Heavy duty 14" wheels

- Rugged helically designed cast mixer blades
- Able to mix material quickly, consistently, thoroughly, and splash free
- Standard 20 inch spout with full spout available if specified
- 14 cubic foot heavy gauge steel mixer bowl — counter balanced for easy dumping
- 1-5/8" mixer shaft — largest and heaviest duty in the business
- Smoothest and longest lasting bearings in the industry with a large mud flap for added protection
